

Expert

"With the right background for optimal interpretation of simulation results..."

E04 Being able to interpret simulation results correctly

Motivation:

You would like...

- ✓ a very strong performance in new projects?
- ✓ be able to use simulation technology in practice?
- ✓ master the basics of simulation technology?
- ✓ interpret the results correctly and pass them on to third parties in the best possible way?
- ✓ a strategy from practice that works?

Contents:

Basics of injection molding simulation

- Motivation for the use of injection molding simulations
- How the simulation technology works
- Networking types
- Practical procedure for a simulation calculation
- Possibilities for showing results

Interpretation using a practical example (workshop)

- Checklist for the systematic interpretation of results

Engineering office Schötz Kunststofftechnik GmbH

Information:

Academy

In-House

Duration: 1 day

Injection Molding
Academy
